

## 20ft Refrigerated Container

Our 20 foot refrigerated storage containers are designed for outdoor use and are well suited for extreme outdoor conditions. However, they can just as easily be placed inside your warehouse for indoor cold storage for a variety of unique applications.

20 foot refrigerated containers are delivered on a small roll back truck and placed directly on the ground. They require minimal room on-site and will fit in a standard parking space. Our 20ft refrigerated containers require either 230V or 460V 3-Phase power to operate efficiently and are equipped with approximately a 50' power cord.

AirXpress Hire offers flexible rental programs to satisfy both your short or long term cold storage requirements.
